ISL Detachment Guidelines: A swimmer who has been on the same ISL team for 2 out of the last 3 years prior to the current season, may be allowed to earn points in competition for a club such as NOVA or Aquazots. All other swimmers belonging to year round "club" programs must be formally "unattached" from June 1 through the Championship Meet or at the time of their registration through the Championship Meet, whichever is later, and provide proof of their unattached status if they unattach after June 1 upon request by an ISL designee. These swimmers may not earn points in competition for another team or club. They are encouraged to actively participate in workouts and meets of their ISL team from June 1 through the Championship Meet. In the event an ISL team dissolves, those swimmers who were exempt from unattaching on the dissolved team still retain that exemption if they join another ISL team.
